Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22, drawn to a homogeneous catalyst , classified in class 502, subclass various.
 - II. Claims 23-33, drawn to a method for producing methanol, classified in class 518, subclass 700.
 - III. Claims 34-41, drawn to a method for decomposition of a metal alkyl carbonate to carbon dioxide, classified in class 556, subclass various.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case a method for producing methanol can be practiced with a homogeneous catalyst as disclosed in US patent No. 6,197,271.
3. Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different

Art Unit: 1621

inventions have a different mode of operation.. Invention I is directed to a homogeneous catalyst for the production of methanol, whereas the invention III is directed to a method for decomposition of a metal alkyl carbonate to carbon dioxide.

4. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have a different mode of operation. The invention of Group II is directed to a method for producing methanol, whereas the invention of Group III is directed to a method for decomposition of a metal alkyl carbonate to carbon dioxide.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. A telephone call was made to Ms. Bogosian on 7/11/2003 to request an oral election to the above restriction requirement, but did not result in an election being made

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
